

Project Update

D01 Hagginbottom STORM DRAIN PUMP STATION REHABILITATION PROJECT

May 2018

ISSUE 2

About this Newsletter

This newsletter provides current information about the D01 Hagginbottom Storm Drain Pump Station Rehabilitation Project. If you have additional questions, please contact the department staff listed on the right. A project map is printed on the back of this newsletter for your reference,

Background

The D01 Hagginbottom Storm Drain Pump Station is located west of 4967 Marlborough Way. This station was originally constructed in 1960. All storm water from the adjacent 763 acre water shed is drained or pumped through this station into the American River. It is critical that the station is functional and reliable to provide flood protection for this neighborhood.

Project Description

This project will upgrade the station's electrical equipment to current industry standards. These upgrades include new electrical and instrumentation equipment at the station. In addition, automated trash racks will be installed to eliminate the labor-intensive manual trash rack cleaning and allow debris removal when the station is unstaffed. These upgrades will significantly improve the station's safety, functionality, and reliability to better provide flood protection to the area.

Project Updates

The Sacramento County Board of Supervisors approved the project in November 2017. The construction bid opening was in December 2017. On February 6, 2018, the contract was awarded to the lowest responsive, responsible bidder – Syblon Reid.

Project Schedule

- Construction Begins – June 2018
- Construction Ends – October 2018

All dates are tentative and subject to change

In addition, project information can be viewed online at www.saccodwr.org: (search: D01 Hagginbottom).

Quality Control

The Resident Engineer assigned to oversee construction is Erik Dahl. He will resolve field issues and ensure that project construction meets the design specifications.

During construction, all efforts will be made to minimize residential impacts. Erik will be available to address construction project issues and act as community liaison to the general public.
